Kim Pike
CEIU Local 90102

I am seeking nomination as a delegate to the PSAC National Triennial Convention. The direction of our union is shaped at this convention where delegates review and approve the budget; debate change and make decisions which impact every member. I want to be part of that process and bring forward the perspectives and priorities of our members when we make informed decisions to strengthen our union! I have experience applying convention procedures and I want to ensure members voices are heard, priorities balanced and goals accomplished.

I am a dedicated and experienced union activist who has served in leadership roles, including Mobilization Committee member, Woman's Chair and Local Secretary to President. I am committed to protecting workers' rights and providing strong representation. I have supported members through workplace challenges, grievances, and dispute resolution while working to ensure the fair and consistent application of our collective agreement.

My experience includes organizing fundraising initiatives, providing support for campaigns/events, promoting mental health awareness, and leading member outreach efforts to strengthen engagement and mobilize participation. Union policies, agreements, and decisions affect workers and their families, and I work hard to ensure members' voices are heard and represented. I am involved in political advocacy, promoting union priorities, improving working conditions and advancing member interests and the labour movement.

If selected as a delegate, I will actively participate in discussions, ask thoughtful questions, and consider every decision with our members' interests and the direction of our Union in mind. I will bring the knowledge gained back and share information, explaining how decisions were made, and encouraging member involvement. I believe in building solidarity, resolving conflicts respectfully, and creating positive change through collaboration.

I respectfully ask for your support and the opportunity to represent our members.
