Hello there!

My name is Sean Daley, I work as an Integrity Service Investigator out of Edmonton. I am an executive of my local 30851 as our First Roper Ridge representative. I will have been serving as a union executive and a steward for over three years by the time of the convention. I consider myself a sponge to the role as I'm always learning new things all the time and I ask tons of questions to experienced members, National Union Reps, and Union leaders.

I am incredibly passionate about Union work. One of my biggest goals in life has always been helping people. I don't like the rights of members to be trampled on and I prefer to solve problems through calm mediation when possible, but I won't backdown if that's not possible. I consider myself a populist, so I like to try to do what's best for all of us both on committees, when voting at convention, and while representing individuals to the best of my ability.

I also serve on several committees at my workplace for Occupational Health and Safety, mental health, Fire Safety, First Aid, and I also chair the Health and Wellness Committee.

I always aim to make the best decisions that would lead to the most tangible improvements to all our members' lives. I've been to one convention before, a CEIU convention in June of 2026, and one vote I'm proud to highlight was when I cut short the time delegates were using during the reports to issue “thank yous” to the chair. As I believed we had been sent there with a job to do, to vote on resolutions for our members, and I believe anything that doesn't benefit our members shouldn't be taking up voting time.
